Professional Summary

Software Engineering graduate from ITCR with hands-on experience building full-stack applications and end-to-end data pipelines using SQL, Python, AWS, and Power BI — from schema design and ETL to interactive dashboards and cloud infrastructure. I write maintainable, well-documented code and close skill gaps fast through self-directed projects.

Professional Experience

Monseñor Sanabria Hospital

2025

Software Engineer Intern — SIGAC: Integrated Scheduling & Consulting Room Management System

Enterprise web platform for scheduling, room allocation, waitlist management, and analytics for a public hospital.

- Designed relational database schemas and stored procedures in MySQL to enforce complex scheduling constraints across a public hospital's multi-department operations, ensuring data integrity under concurrent multi-user access.
- Proactively built a statistics and reporting feature beyond the original project scope, giving stakeholders visibility into scheduling trends and resource utilization.
- Gathered requirements directly from healthcare stakeholders, translating clinical workflows into technical solutions with role-based access control; built responsive interfaces with React, TypeScript, and Tailwind CSS.
- Technologies:** MySQL, SQL, React, TypeScript, Tailwind CSS, Figma

Projects

FinRisk Analytics – Financial Risk & Fraud Detection Dashboard

2026

Self-directed project building an end-to-end analytics pipeline — SQL, Python, and Power BI — to detect anomalous banking transactions.

- Building an end-to-end analytics pipeline for simulated banking data — SQL-based storage, a Python anomaly-detection layer (scikit-learn), a star-schema data model, and interactive Power BI dashboards with DAX time-intelligence measures.
- Integrating the Anthropic Claude API to auto-generate natural-language executive summaries directly from dashboard KPIs.
- Technologies:** Power BI, DAX, Power Query, SQL (PostgreSQL), Python, scikit-learn, Anthropic Claude API

Pulse – Personal News Briefing Application

2026

Serverless data pipeline delivering AI-curated daily news briefings across 10+ categories with real-time web search integration.

- Architected a full-stack serverless pipeline with clean separation between ingestion, AI processing, and presentation layers; provisioned complete AWS infrastructure as code with Terraform (Lambda, DynamoDB, API Gateway, EventBridge) using least-privilege IAM policies and automated daily execution.
- Implemented a two-layer caching strategy (DynamoDB TTL + client-side) to cut API costs and latency; wrote unit/integration tests with Jest covering Lambda handlers and caching logic.
- Technologies:** AWS Lambda, DynamoDB, API Gateway, EventBridge, Terraform, Node.js, TypeScript, Anthropic Claude API

RAG Chatbot – Intelligent Q&A System

2026

Complete data ingestion & retrieval pipeline — capstone of the Agentic AI Development Bootcamp (AGAI-03).

- Built a web scraping and data preprocessing pipeline; generated 100+ synthetic Q&A pairs and stored semantic embeddings in a vector database for context-aware retrieval, with a hybrid semantic + similarity-fallback design.
- Delivered a Streamlit UI with source citations and confidence statistics, documented for non-technical stakeholders.
- Technologies:** Python, LangChain, ChromaDB, Streamlit, Anthropic Claude API

Education

Costa Rica Institute of Technology (ITCR)

2021 – 2026

Bachelor's Degree in Computer Engineering

Cartago, Costa Rica

Codecademy

2026 – Present

Agentic AI Development Bootcamp (AGAI-03) · Full-Stack Engineer Certification

Technical Skills

- Languages:** Python, SQL, JavaScript, TypeScript, Java
- Data & BI:** Power BI, DAX, Power Query, Data Modeling (Star Schema), ETL, scikit-learn
- Databases:** MySQL, PostgreSQL, MongoDB
- Cloud & DevOps:** AWS (Lambda, DynamoDB, API Gateway, EventBridge), Terraform, Docker, Git, CI/CD
- Backend & APIs:** Node.js, Express, REST APIs
- AI:** Anthropic Claude API, LangChain, RAG Pipelines
- Frontend:** React, Tailwind CSS, HTML/CSS
- Spoken Languages:** Spanish (Native), English (C1)

Extracurricular Activities

Finalist – Reto Marte

June 2025

Hackathon by Fidelitas – Innovation & Sustainability Challenge. Led a team of 5, driving technical proposals that reached the top 7 teams.
